Superintendents of Electrical Department. 137.

SPEAKER, Mr. (Sri H. S. RUDRAPPA)—

Observation (s)—

Adjournment Motion—

There cannot be any discussion on an—until it is admitted by the Chair. 59.

Bill—

Anybody who is anxious to close the debate on a—may move a closure motion. 724.
During consideration stage of a—only principles of a Bill can be discussed. With regard to improvements to the provisions of a Bill, since the Bill may undergo changes in the Select Committee and even afterwards, amendments could be brought to each clause at that stage. 259.
The Hon'ble Members must not make a reference to what the Chief Minister said outside the House regarding certain other matters while speaking on a——. 125.

General—

A Minister can sit in any place, but he cannot take the position of the Leader of the Opposition. 574.
Any member of the Government on behalf of any other member of the Government can lay on the Table of the House papers or move even motions. 651.
No personal recrimination should be made by one Member against another Member of the House. 570-571.
Personal references to officers working in the Department of Government who are not in a position to defend themselves should be avoided. 369.
The House cannot debate on the prorogation of the Assembly since it comes within the purview of His Highness the Rajpramukh. 650.
Unless some business concerning the House is placed on the Table and a motion is moved, no outside matter can be discussed on the floor of the House. 571.

Question (s)—

—— and answers are not allowed between Members. 579.
——hour is limited to only one hour. The Chair cannot relax and by-pass the rule since the breach of the rule is neither helpful nor healthy. 255.
Similar —— will be marshalled and made to appear on the same day so that there will be no waste of time. 489.
Supplementaries should generally arise out of the answers given and they should not be completely different from the main——. 91.

The Minister cannot be expected to give a substance of the full judgment while answering supplementaries on a.— 522.

Though it is the concern of the Government of India to provide railway facilities, the Mysore Government is concerned with making recommendations and it is in order to express concern about the railway facilities in the Mysore State not being adequate, while answering — 90.

Short Notice Question—

Unless the Minister concerned agrees to answer—it cannot be admitted. 650.

Ruling(s)—

Adjournment motion—

—— relating to accident during Dasara Procession, though it is a matter of importance, is not very urgent in the sense that it should be permitted to interfere with the normal work of the House, and it is therefore disallowed. 63.

The Minister cannot oppose an—when he makes a statement before its admissibility or otherwise is decided by the Chair. He can merely make a statement on the adjournment motion. 59-60.

Bill(s)—

According to rules of procedure, it is only in the case of ——, originating in the Assembly that the Bill is required to be accompanied by a Statement of Objects and Reasons. Rule 90-F merely requires that the Bill as passed by the Council shall be laid on the Table of the House and does not say anything about the Statement of Objects and Reasons. But the practice has been to lay on the Table of one House the Bill as passed by the other accompanied by the Statement of Objects and Reasons as it was originally appended to the Bill with a view to give the members of the House an idea of the purposes underlying the Bill when it was first introduced in the other House. However, it is desirable that the Government should always amend the Statement of Objects and Reasons in conformity with the amendments effected by the originating House before taking it up in the other House. But as the Statement of Objects and Reasons is not part of the Bill, there can be no objection to taking up the Bill for consideration. 569-570.

A member should strictly confine himself to the particular items of expenditure referred to in the supplementary grants while speaking on the relevant Appropriation ——. 499.

It is not necessary that the Finance Minister or the particular Minister should reply to the debate on Mysore Appropriation ——. Any member of the Government on behalf of the Government can reply to the debate, and there is no illegality or any impropriety in doing so. 513.

Resolution(s)—

Similar —— cannot be taken up together. But movers of resolutions will be given an opportunity to support an earlier resolution on the same subject. 374.

Supplementary grants.—

The debate on —— will be restricted to the particulars contained in the estimates on which these grants are sought and the debate cannot touch the policy underlying the original grant except in certain circumstances. Similarly, cut motions will be restricted to the items covered by the supplementary estimate. 199.

The procedure for the debate on —— will be as follows :—

All the motions for Grants will be moved together. In respect of each Demand a specified time will be allotted. Discussion will proceed on that Demand and on the expiry of the allotted time, the House will proceed to the discussion of the next Demand. At 5 o' clock, all the Demands will be put to vote together. 200.

Statement(s)—
